

Maths	Children will be continuing with work on the four operations; addition, subtraction, multiplication and division. They will be using and applying the skills already learnt into a variety of different problem solving contexts and challenges to build fluency and reasoning. As well as this they will be working on investigations into shape and space, measures and decimals, fractions and percentages.
English	In English we will be writing weather poems. Studying stories from other cultures and writing non-chronological reports. We also complete our discussion topic.
Spelling and Grammar	Children will continue to use the Read, Write Inc. materials to develop their knowledge of spelling patterns and word groups in context.
Science	In Science this term we will be investigating plants followed by looking at Food Chains and Classification.
Geography	Children will look at landscapes, different places and plan different journeys. This will include map and atlas work.
ICT	We will use the internet to research historical and geographical data about our places of interest.
PSHE	There will be a continued focus upon growth mind-set and developing good behaviours for learning. We will use PATHs sessions and circle time to focus upon being assertive and communicating clearly to solve problems.
Music	Weekly drumming lessons.
RE	Looking at the important events in the life of Jesus.
PE	Gymnastics: travel, sequences and balances.
Art/D&T	We will be creating art work based on different landscapes.
